

## Palette CAD – CNC-Converter **PCAD2WOP**

**Palette CAD** means presentation, planning, producing, especially for furniture and interiors.

The workpieces contain details for the production so you wish to generate cnc-code directly out of Palette CAD.

This is possible now with the new low-cost converter **PCad2Wop** from **camSol**.

More than **20 years of experience** in the field of CAD/CAM/CNC in woodworking at camSol ensure that the generated cnc-programs will run on your machine.

Practice-oriented details help you to work with the converter fast and efficiently.

The batch-mode allows you to convert all workpieces of an order in one step.

You only have to press one button in Palette CAD to generate all cnc-files for all workpieces of a complete order.

Or if you work with an elder machine or control with length-restricted filenames (e.g DOS: 8 characters for filenames) you can define using a conversion-table which short (or language translated) names should always be used instead of the standard long names in Palette CAD. Using our optimizer for drillings **DrillOpt** optimized spindle-combinations for elder cnc-machines (like Morbidelli TRIA 7500) can be generated.

These are only some examples of practice-oriented details of PCad2Wop.

The installation of the converter is simple, it works fully automatic without additional manual input and is now available for the following WOP-systems:

- |                               |  |
|-------------------------------|--|
| - <b>BIESSE WORKS</b>         | (BIESSE-machines)                                  |
| - <b>IMAWOP 2.x - 6.x</b>     | (IMA-machines)                                     |
| - <b>WOODWOP 2.x - 5.x</b>    | (HOMAG- / WEEKE-machines)                          |
| - <b>XILOG</b>                | (SCM- / Morbidelli-machines)                       |
| - <b>SIEMENS WoodStep</b>     | (for IMA and HOLZHER)                              |
| - <b>Genesis Evolution</b>    | (e.g. for machines Felder Format-4 oder Busellato) |
| - <b>TRIA (e.g. TRIA7500)</b> | (Morbidelli-machines)                              |

Adjustment for other machines is in work and will be done when required.
